

TUSHAR MONDAL

SOC Analyst L1 | Cybersecurity Fresher

Kolkata, India | 7439213393 | tushar23016@gmail.com | [LinkedIn](#) | [GitHub](#) | [TryHackMe](#)

PROFESSIONAL SUMMARY

Cybersecurity-focused B.Sc. IT - Cloud Technology and Information Security (CTIS) student (CGPA: 7.99), currently pursuing the degree, with hands-on experience building security labs using Linux, Windows, Wazuh, and networking tools. Strong foundational knowledge of security monitoring, SIEM, log analysis, network traffic analysis, incident triage, and common attack techniques. Familiar with Wazuh, Splunk, ELK Stack, Microsoft Sentinel, Wireshark, Nmap, and Burp Suite. Seeking an entry-level SOC Analyst L1 role to apply practical skills in security monitoring, alert investigation, incident analysis, and threat detection.

TECHNICAL SKILLS

- SIEM & Security Monitoring: Wazuh, Splunk, ELK Stack (Elasticsearch, Logstash, Kibana), Microsoft Sentinel
- Security Operations: Alert Triage, Log Analysis, Incident Response, Incident Investigation & Escalation, IOC Identification, Threat Detection, Threat Intelligence Basics
- Network Security: Network Traffic Analysis, Wireshark, Nmap, TCP/IP, Firewalls, IDS/IPS Concepts
- Application & Web Security: Burp Suite, Phishing Analysis, Vulnerability Assessment Basics, OWASP Top 10 Awareness
- Frameworks & Methodologies: MITRE ATT&CK Framework, NIST Cybersecurity Framework (basic), SOC Workflow (Triage - Investigation - Classification - Escalation)
- Systems & Scripting: Linux Administration (Ubuntu), Windows Administration, Active Directory Basics, Python, Bash Scripting, Flask
- Tools & Platforms: VirtualBox, Kali Linux, Git/GitHub, Cryptography Fundamentals (Caesar Cipher, Base64, Fernet Encryption)

PROJECTS

SOC Home Lab & Security Monitoring

08/2026 - Present

- Built a virtualized SOC home lab using Wazuh, Ubuntu Server, Windows, Kali Linux, and VirtualBox.
- Deployed and configured Wazuh for centralized security monitoring and endpoint visibility.
- Configured a Windows endpoint for security-event monitoring and log collection.
- Generated and investigated authentication and system-security events using the Wazuh dashboard.
- Practiced security alert triage, log analysis, IOC identification, and incident investigation.
- Used Kali Linux to generate controlled security events and validate monitoring and detection capabilities.
- Documented investigation findings and followed a standard SOC workflow: alert triage, investigation, classification, and escalation.

CloudCrypt - Encryption & Decryption Web Platform

2026

- Built a web-based cryptography application using Python Flask, HTML/CSS/JavaScript, and the cryptography library.
- Implemented Caesar cipher, Base64 encoding, and Fernet-based encryption/decryption with a responsive UI; deployed on Render.
- Gained practical experience in Flask web application development and integrating cryptographic functionality into a web interface.
- Learned the end-to-end deployment workflow for a web application and how frontend, backend, and security components work together.

AI Phishing Detector - PHISHLENS

06/2026 - 07/2026

github.com/tushar23016/AI-Phishing-Detector

- Developed a web-based phishing detection application for analyzing suspicious email content.
- Implemented phishing email analysis to identify potential malicious indicators.
- Designed an analyst-oriented interface for email analysis, investigations, IOC lookup, and reporting.
- Incorporated security indicators including suspicious URLs, domains, and email characteristics.
- Built the application using Python, Flask, HTML, CSS, and JavaScript.

EDUCATION

B.Sc. IT - Cloud Technology and Information Security, Techno India University

06/2023 - 06/2027

CGPA: 7.99 / 10 | Kolkata, India

- Currently pursuing a B.Sc. in Information Technology with a specialization in Cloud Technology and Information Security.
- Developing practical knowledge of cybersecurity, networking, Linux administration, SIEM, security monitoring, and incident analysis.

LANGUAGES

Bengali (Native Speaker) | English (C2) | Hindi (C1)

INTERESTS

Cybersecurity labs and CTF challenges, technology research, UI/UX design, and drawing.
